

# FSU50

## Heavy Duty Manual Bag Sealer

### DATA

Production Speed Up to 5 packages per minute

Package Size Minimum 5-inches face x 5-inches length

Maximum 19-inches face x 34-inches length (conveyor to seal bar)

### Portable, Manually Operated, Hermetic Bag Sealer. Simple to Operate.

The Fres-co FSU50 Bag Sealer is a heavy duty manually operated bag sealer for large size pre-made bags and pouches. The machine is designed for use with barrier laminates that require hermetic sealing, but can also seal other types of materials such as plastic, foil and paper laminates.

To ensure the versatility you need, the Fres-co FSU50 Industrial Sealer can be easily moved among slower speed or manual filling operations and with an optional bag conveyor it is capable of handling bags that weigh up to 100lbs. Our convenient heat-sealing system is especially suitable for food and feed ingredients, specialty chemicals and minerals, agricultural chemicals, engineered resins, and pet food products. A user-friendly control system provides the safety and assurance required by industry standards.

Our North American-based Packaging Equipment Technical Support Team will install and test the Fres-co Industrial Sealer and properly train the operators and personnel to ensure the optimal equipment performance.

### **Packaging Applications:**

- Food Ingredients
- Feed Ingredients
- Specialty Chemicals and Minerals
- Agricultural Chemicals
- Pet Food
- Cosmetic Ingredients
- Pharmaceutical Ingredients

### **Features:**

- Capable of Sealing 2 to 5 Bags per Minute (output varies depending on operator dexterity, size, weight and type of high barrier material)
- Adjustable Seal Head Elevation
- Foot Pedal or Proximity Switch Activation
- Resistance-Type Heat Seal Bars with Dual Temperature Controllers
- Adjustable Seal Pressure and Dwell Time
- Left or Right Hand Orientation

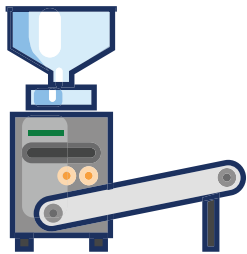

### **Package Types**

- Pre-made Bags
- Pouches
- Flat/Pillow Pouches

### **Options:**

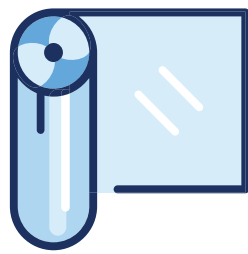

- Stainless Steel Cover with Tempered Glass
- Gravity Roller Conveyor
- Locking Castors for Easy Movement to Filling Operations
- Multiple Voltages
